

Strip-LED

Linear LED Lighting With Optional Corner Extrusion

Hera's new Strip-LED is perfect for installation in showcases, displays or furniture. The Strip-LED comes in three different sizes (1', 2', 3') and can be recessed or surface mounted. The optional corner extrusion makes this the perfect lighting solution for showcases. Virtually no heat emission, no ultraviolet radiation, low energy consumption, a high and even light output and a long useable LED lifetime (50,000 hrs.) are some of the main benefits of Strip-LED.

Product-Features

- Anodized aluminum housing with plexiglass cover
- Extremely small dimensions: width: 1 1/8", height: 1/4"
- Available in three different sizes: 11 7/8" (3 x 1 W LED), 23 5/8" (6 x 1 W LED), 35 7/16" (9 x 1 W LED)
- Ready to connect to 350 mA constant current power supply, 72" connecting cable with plug-in connector attached.
- High, even light output
- Optional aluminum corner extrusion available
- Available with cool white (5,500 K) LEDs

Easy Installation
