

# WOOD PANTRY

## INSTALLATION INSTRUCTIONS

Inspect all parts and read all instructions prior to beginning assembly and installation.

### Parts List

- A. Swing-Out Assembly (1)
- B. Door Mount Assembly (1)
- C. 4' Piano Hinge (1)
- D. Hardware Package (1)
  - 24 - Adjustable Locking Shelf Clips
  - 45 - #6 x 1/2" Pan Head Screws for Piano Hinge
  - 4 - #6 x 1" Phillips Flat Head Screws for Door Unit

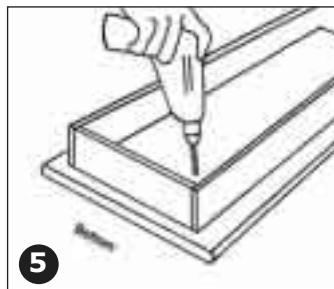

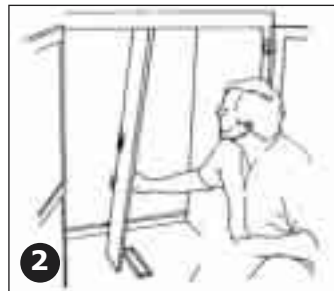

### Tools Required

- Electric Drill
- 3/32" Drill Bit
- Ruler
- #2 Phillips Head Screwdriver (Standard Size)
- Framing Square
- Pencil
- Center Punch

### Product Assemblies

- PANTRY1-KIT
- PANTRY2-KIT

- Step 1 (NOTE: Use Step 1 & 2 if you are installing the Center Mounting Panel.)** Using the Framing Square, locate the center of the bottom shelf in the cabinet. Locate the wood socket for the center mounting panel 5" back from the front of the cabinet to clear the door unit when the door is closed. With a punch, mark the holes for mounting the bottom socket and attach with screws. Then repeat this procedure on the bottom side of the upper shelf.
- Step 2** When both sockets are attached, measure the distance between the 2 parts then add 1 inch and cut the center panel to length. Remove the top socket, insert the panel into the bottom socket, place the top socket on the center panel and push into place and reattach the top socket to the upper shelf.
- Step 3** Locate the swing-out units either on the center panel or the sides of the cabinet, and attach using piano hinge and screws provided.
- Step 4** Place Shelf Clips in the holes provided at locations you desire. Place the shelves into clips by pressing down on the shelf. Then slide the shelf fronts down into place resting on each shelf.
- Step 5 Installation of Door**  
Determine the best location for mounting holes on the door unit then drill the holes into the mounting cleats of the door unit.
- Step 6** Locate the unit on the back side of the pantry door and attach with screws.
