GENERAL CLEANING

The non-porous surface of KRAUS solid surface composite sinks is enhanced with innovative Nano technology, making it impervious to stains and water spots as well as extremely easy to clean. For light cleaning and maintenance, you can use water and a mild liquid soap detergent or a vinegar and water solution. Apply the cleaner with a soft microfiber cleaning cloth or soft (non-abrasive) sponge. Wipe in circular motions, then rinse with lukewarm water and pat dry with a microfiber cleaning cloth.

HARD WATER SOLUTIONS & DEEP CLEANING

To prevent mineral deposits from forming on the sink in areas with hard water, rinse the inside of the sink and wipe it with a microfiber cleaning cloth after every use. Occasional use of a microfiber cleaning cloth and baby oil to treat all surfaces is suggested.

SCRATCHES AND SCUFFS

Kraus Solid Surface Sinks are extremely resistant to chips, cracks, abrasions, and other damage caused by dropped items. Should you experience damage from heavy use, minor chips and scratches can easily be resolved due to the renewable properties of the solid surface material – Simply buff the affected area with a fine-grit abrasive paper until the mark disappears.

THINGS TO AVOID

- DO NOT use abrasive pads, steel wool, or wire brushes when cleaning the sink. Please be careful with any materials containing abrasives
- DO NOT spill chemicals such as paint stripper, metal cleaners, or cleaners containing methylene chloride or acid into the sink. Any spills of such chemicals should be washed away immediately with soapy water
- DO NOT use cleaners that contain lime removal agents such as CLR or Lime-A-Way
- DO NOT leave metal objects or standing water in the sink
- DO NOT use products containing artificial dyes
- DO NOT use water that exceeds 70°C (158°F) as this constitutes improper use, which may damage the sink and invalidate the warranty

PRODUCTS TO CONSIDER

- Dishwashing soap
- White vinegar + water solution 50/50
- Soft Scrub®
- Bar Keepers Friend®
- Mild bleach solution

Natura™ Solid Surface Vessel Bathroom Sink (KSV-6MW)

GENERAL CLEANING

The smooth non-porous ceramic surface is extremely durable and stain-resistant. To prevent water spots, clouding, and discoloration, rinse and wipe the inside of the sink with a microfiber cleaning cloth after every use. For a more thorough cleaning, use water and a mild liquid soap detergent or a product from the “Products to Consider” section below. Apply cleaner with a soft sponge or microfiber cloth, then thoroughly rinse with lukewarm water and pat dry with a microfiber cleaning cloth.

HARD WATER SOLUTIONS & DEEP CLEANING

To prevent mineral deposits from forming on the sink in areas with hard water, rinse the inside of the sink and wipe it with a microfiber cleaning cloth after every use. If hard water deposits build up over time, we recommend using vinegar to neutralize the minerals and remove the deposits. Use a soft dishcloth saturated with vinegar to gently rub the sink surface, then rinse with water and towel dry.

To combat tough stains like rust (caused by mineral deposits from the water supply) or toothpaste residue buildup, use a solution of baking soda and vinegar. Combine the two ingredients into a paste and apply directly to the stain. Let the paste sit for 10 minutes, then rinse with lukewarm water and pat dry with a microfiber cleaning cloth.

THINGS TO AVOID

- DO NOT use cleaners containing any abrasive powders, bleach, ammonia, alcohol, or chlorine
- DO NOT use any abrasive pads, steel wool, or wire brushes when cleaning the sink (Use only non-scratch pads)

PRODUCTS TO CONSIDER

- Dishwashing soap
- White vinegar + water solution 50/50
- Soft Scrub®
- Bar Keepers Friend®
- Mild bleach solution

Viva™ Porcelain Ceramic Vessel Bathroom Sink (KCV-200GGR)

Viva™ Porcelain Ceramic Vessel Bathroom Sink (KCV-201GWH)

GENERAL CLEANING

To keep your glass sink looking like new and prevent water spots and clouding, rinse and wipe the inside of the sink with a microfiber cleaning cloth after every use. For a more thorough cleaning, use water and a mild liquid soap detergent or a product from the “Products to Consider” section below. Apply cleaner with a soft sponge or microfiber cloth, then thoroughly rinse with lukewarm water and pat dry with a microfiber cleaning cloth. For heavy-duty cleaning, we recommend using Rejuvenate Glass and Ceramic Restorer to clean and restore luster while creating a non-stick barrier to make future cleanup easier.

HARD WATER SOLUTIONS

To prevent mineral deposits from forming on the sink in areas with hard water, rinse the inside of the sink and wipe it with a microfiber cleaning cloth after every use. If hard water deposits build up over time, we recommend using vinegar to neutralize the minerals and remove the deposits. Use a soft dishcloth saturated with vinegar to gently rub the sink surface, then rinse with water and towel dry.

To combat tough stains like toothpaste residue buildup, use a solution of baking soda and vinegar. Combine the two ingredients into a paste and apply directly to the stain. Let the paste sit for 10 minutes, then rinse with lukewarm water and pat dry with a microfiber cleaning cloth

THINGS TO AVOID

- DO NOT use cleaners containing any abrasive powders, bleach, ammonia, alcohol, or chlorine
- DO NOT use any abrasive pads (Use only non-scratch pads)

PRODUCTS TO CONSIDER

- Dishwashing soap
- White vinegar + water solution 50/50
- Cinch® Streak-Free Multi-Surface Cleaner
- Mr. Clean® Antibacterial Multi-Surface Spray
- Formula 409® Glass & Surface Cleaner
- Rejuvenate® Cooktop & Oven Cleaner & Restorer

Nature Series™ Glass Vessel Bathroom Sink (GV-391-19mm)

GENERAL CLEANING

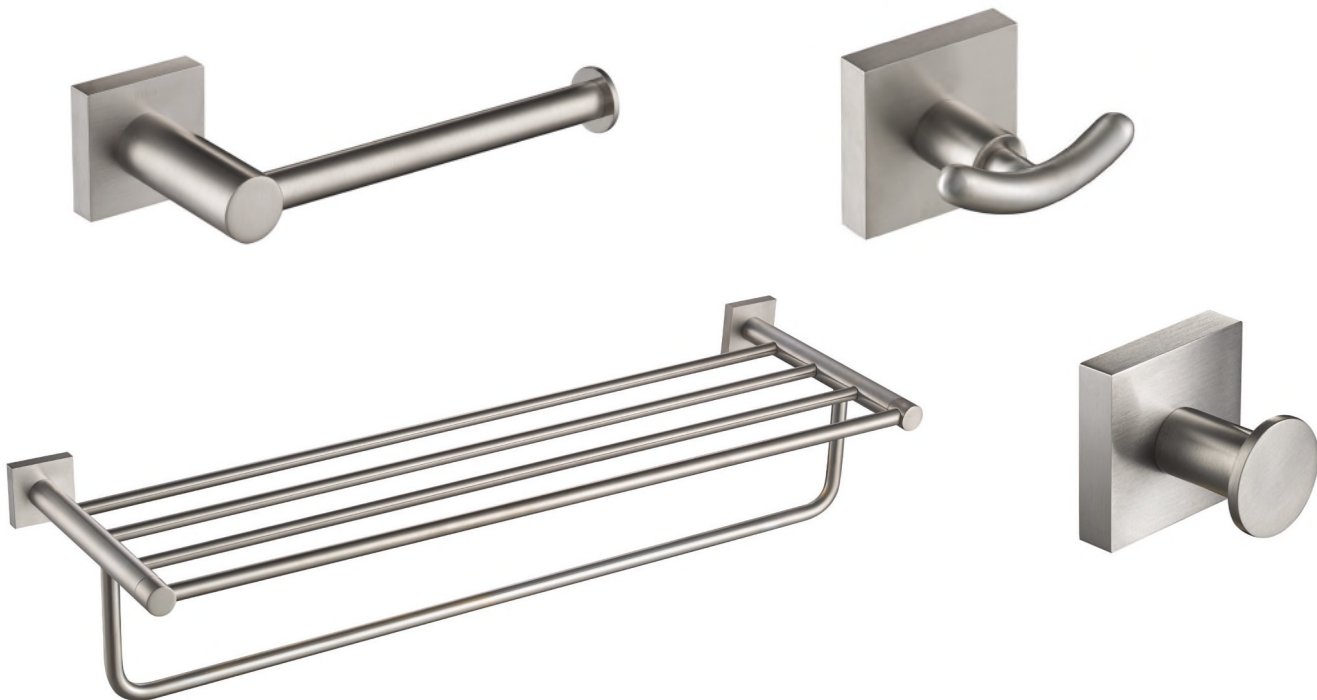

For general maintenance, periodically wipe the bathroom accessory with a soft microfiber cloth, or use your choice of cleaner from the “Products to Consider” section below. We recommend spot-testing any new cleaner on a hidden area of the accessory before applying it to the entire surface.

THINGS TO AVOID

- DO NOT use cleaners containing any abrasive powders, bleach, ammonia, alcohol, vinegar, or chlorine.
- DO NOT use abrasive pads, steel wool, or wire brushes when cleaning the faucet.

PRODUCTS TO CONSIDER

- Fantastik® Antibacterial Heavy Duty Cleaner
- Green Works® All-Purpose Cleaner
- Green Works® Glass Cleaner
- Windex® Original Glass Cleaner
- Soft microfiber cloth
