

Emerg-A-Center™

Safety hidden within reach

Creating a new age in **smarter** and **safer** homes and offices

Every day, individuals are placed in life threatening situations

at home or work leaving untrained family members and coworkers to perform life-saving actions. With the average EMS response time of 9 minutes, it is often up to bystanders to provide immediate care.

Emerg-A-Center

The market's only safety command center creates a smarter, safer home and office by storing life saving devices in a central cabinet making them easy to find in seconds. With an embedded instructional video, individuals can be trained and ready to save a life. Safely hidden in a laundry room, kitchen, office or garage, the cabinet can be customized to match design and style choices.

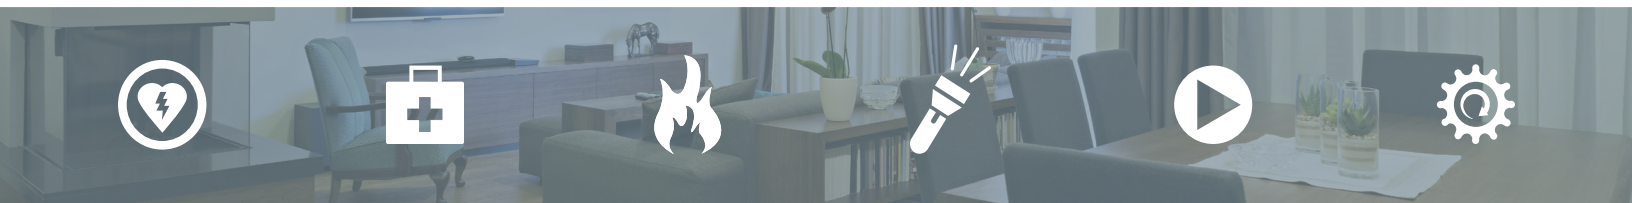

Benefits

- Immediate emergency care at home and work
- Easy to train others including family members, childcare providers, and employees
- Safely hidden among your décor
- Easy to use and maintain
- OSHA and ANSI Certified

Actual Emerg-A-Center cabinet

Homes and offices are the **second** and **third** most **dangerous places** behind the highway Source : U.S. News & World Report

Features

Automated External Defibrillator (AED)

In the US alone, over 326,000 people of all ages suffer an out of hospital sudden cardiac arrest event¹. A patient's best chance of survival is to be treated immediately with an AED². 80-90% of patients treated with an AED survive³. Designed for public use, the HeartSine® samaritan® 350P AED features a simple interface with visual and video prompts and the carrying case makes it available at home or on the go. Suitable for use on adults and children, the 350P is the premier choice for home and public access.

First Aid Kit

From small cuts and scrapes to minor injuries, a well-stocked first aid kit provides the necessary tools to treat a patient. **Emerg-A-Center** comes equipped with a first aid kit complete with necessary supplies such as bandages and first aid cream that are centrally organized for easy use. Both OSHA and ANSI certified, this kit meets necessary requirements for a safe home and workplace.

Fire Extinguisher

Fires can pop up anywhere and in an emergency, that fire must be extinguished safely.

Emerg-A-Center stores a class ABC fire extinguisher. At 2.5 pounds it is lightweight and effective; perfect for home or office emergencies and safe for wood, plastic, liquid or electrical fires.

Flashlight

Power outages leave everyone looking for a flashlight but to their dismay; they are often misplaced or out of batteries.

Emerg-A-Center comes equipped with a Duracell™ high-intensity LED flashlight. With variable focus and rugged casing, this flashlight is equipped to handle home and office needs.

Instructional Video

While many people can spot safety equipment, most have never encountered them or know how to use them. Add the additional stress that is common in the face of emergency and there are delays in providing the necessary care. Education and reminders are key in keeping individuals and family members trained in an emergency situation. **Emerg-A-Center** provides on-demand video education through an embedded tablet which reviews how to use each device as well as perform CPR.

Maintenance

All safety equipment must be maintained in order to be effective. **Emerg-A-Center** includes full program management for the first year on all components including monthly reminders and support for replacement. *Premier Storage Systems* is pleased to offer LIFELINK Central for full support of the AED including batteries and pads.
