4. Technical Data

Applicable Standards: Sliding closet storage aids are tested to meet or exceed ANSI performance standards as established by BHMA in the Knapé & Vogt (KV) recommended application.

Results were obtained by laboratory testing in accordance with ANSI/ BHMA A156.9-2003 performance standard. Actual use conditions will typically result in lower load capacity than laboratory conditions.

Representative testing in a fully configured application is the only way to assure proper performance, durability, and safety.

Load bearing capabilities depend upon the type of cabinet/ wall material and use of appropriate mounting fasteners, installation technique, spacing, and construction.

Environmental Considerations:

Environment: Excessive humidity, salts, or other chemical agents can corrode the finish and attack metal or plastic components.

Fastening: Inadequate or incorrect fasteners can result in the product pulling loose and causing damage.

Alignment: Improper product alignment can result in a product that is ineffective and unsafe.

5. Installation

Place product in desired position. Mark location of screw holes. Pre-drill screw holes and fasten product to wall/cabinet with provided screws.

6. Availability and Cost

Availability: Knapé & Vogt (KV) products are available from stocking distributors and through KV Representatives worldwide.
