DISPENSA Pantry VVS-X

1 Check your cabinet construction

The diagram illustrates the correct cabinet construction for the dispenser. It shows a side view of the cabinet with a checkmark indicating it is correct. A detail view shows a gap between the cabinet and the dispenser base, labeled "max 3.2 (1/8)".

2 Use a shim

mm

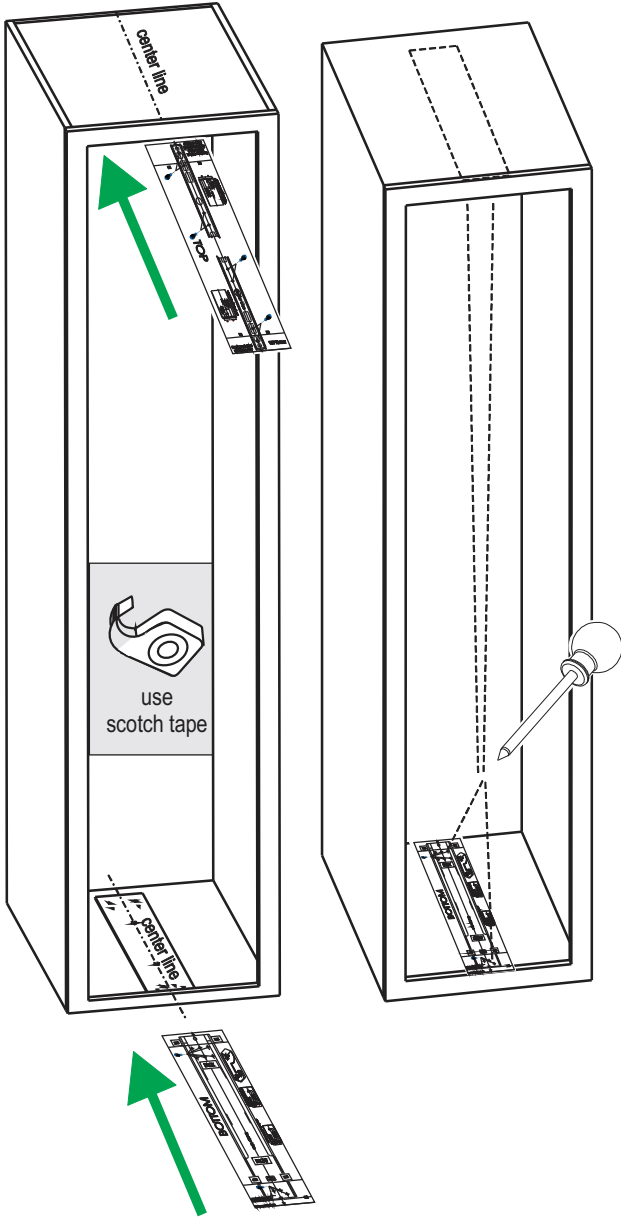

The diagram shows the use of a shim to level the dispenser. A dimension of "min. 50 (2)" is shown for the shim's length. The shim is placed between the cabinet and the dispenser base, with the word "flush" indicating it should be flush with the cabinet. A dimension of "420 (16 1/2)" is shown for the shim's width. Below this, a diagram shows the dispenser being installed in a cabinet with a red warning triangle, indicating that the cabinet is not level and a shim is required.
