|  A rectangular metal control unit with a white faceplate. It features two rotary switches: the top one is labeled 'Light' and the bottom one is labeled 'Fan'. The 'Fan' switch has three settings: 20, 40, and 60. Three colored wires (red, green, blue) are connected to the top of the unit. The unit is mounted on a metal bracket with mounting holes. | <p>Control with Delay Switch: Can turn on the fan and the light simultaneously. The automatic delay timer operates the fan for an additional 20, 40 or 60 minute, even when the light is shut off.</p> |
|  A white rectangular control panel with a large circular dial in the center. The dial is marked with humidity percentages: 20%, 30%, 40%, 50%, 60%, 70%, and 80%. There is a small white circle on the right side of the dial and a small black square on the left side. The 'Air King' logo is visible at the bottom left of the panel. | <p>Dehumidistat Control: Automatically turns the exhaust fan on or off depending on the level of humidity in the room. The dial control with adjustable set points allows for easy operation.</p> |
