## **Cookware Stand – Knock Down CWS7 kd**

**Enclume racks are the ultimate in  
Storage racks made.**

**WARNING:  
READ ALL OF THE INSTRUCTIONS  
BEFORE ASSEMBLING AND USING  
YOUR RACK.**

Enclosed you will find everything needed for the assembly and use of your storage rack. Two people make assembly and installation easier. The parts and hardware included are:

**Hardware included:**

- 21 – Barrel Nuts ~ 10 x 24 x 7/16"
- 21 – Barrel Screws ~ 10 x 24 x 5/16"
- 3 – Felt Pads
- 2 – 5/32" Hex Key

**Components included:**

- 3 – Uprights
- 7 – Sets of Shelves (1 - 7) Each set contains 3 shelves

**All of our hammered steel racks are finished with an industrial wax designed to give years of protection to the rack. Cleaning is easily done with a damp cloth. Dry thoroughly after cleaning. If a touch-up is ever needed we recommend a "Pledge" like wax product.**

### **Rack Assembly**

- 1) Place two of the three uprights on a firm surface with the angled ends both at one end. (NOTE: one upright should have the angled tab facing up toward the ceiling, while the other upright tab is facing in the opposite direction.)  
NOTE: Before attaching the shelves in the next steps, we recommend that you insert the barrel screws and bolts, all in the same direction on the shelves and each upright for a uniform look.
- 2) Locate Shelf #7 (set of three) starting at the bottom of the rack. Using two of the three shelves, attach the two shelves by inserting a barrel and bolt through the hole in one end of the shelf, through the upright and THROUGH THE HOLE IN THE OTHER SHELF. Attach the 3 pieces making sure the upright is between the two shelves with the barrel screws and bolts, Do NOT fully tighten at this time
- 3) Using the third shelf of the set repeat Step #2 for the second upright.
- 4) Locate the third upright and attach to the remaining open ends of the shelf, as in Steps 2 and 3.
- 5) Repeat Steps 2-4 using the #1 set of shelves at the opposite end or top of the stand.
- 6) Your stand is ready to stand up.
- 7) Repeat Steps 2 – 5 for the remaining 5 sets of shelves.
- 8) Level rack and tighten **TOP** shelf first, then the bottom shelf. Square up the unit and securely tighten all fasteners.
- 9) All of our hammered steel racks are finished with an industrial wax designed to give years of protection to the rack. Cleaning is easily done with a damp cloth. Dry thoroughly after cleaning. If a touch-up is ever needed we recommend a "Pledge" like wax product.

It is important that your rack is assembled correctly. If the unit is assembled or used incorrectly, it could become unstable and collapse, possibly causing injury.
