

## Safety Information

1. Please read carefully and follow all instructions when operating.
2. Qualified earth leakage circuit-breaker must be installed and tested with trial jump to certify the device is qualified and safety before using the product.
3. To avoid electrical shock, the replacing of the wire must be done by the electrical engineer or the retailer. Customer could not replace by yourself.
4. Ground wire of massage water pump and air pump must be connected to ground well, the minimum size copper wire of ground wire must not be less than 1.5mm<sup>2</sup>.
5. It is forbid to remodel, add or take part products.
6. Please don't use this product after alcohol or drugs.
7. The children shall be closely supervised by parents to use product.
8. All the electrical spare parts except the remote control must be put suitable and stable to avoid slip into the tub.
9. Warning: the mixed water temperature shall never exceed 60 degree centigrade.
10. Don't use sulphuric acid, hydrochloric acid, lye and other mixed strong corrosive chemical liquid to clean product.
11. The water pump would be very hot when running. Please don't touch the surface of the machine to avoid scald.
12. The water level must be higher than the jet before turning on the product.
13. Please don't drop anything in or insert water pump and the opening hole of machine. The socket position should be suitable.
14. Warning - To prevent risk of electric shock, please connect the GFCI / RCD (earth leakage protection device) socket.
15. Warning - To prevent electric shock, please do not connect any extension cord to the power supply.

16 Caution - please use the product under the following condition: water pressure is 0.15 ~ 0.40MPa, the ground must have the ability to support the estimated load, water can not exceed the overflow level, the washroom need to reserve enough space for proper to handle the overflow of water.

17. WARNING - for bathtub to be used normally please do not grasp the hand wheel drainer, nozzles, piping, handrails, etc., to cause any leakage and other problem when unpacking the product.

## Maintenance instruction

### 1. Clean the acrylic surface:

Clean acrylic surface with cotton flannel or sponge and water in daily life. If there is scratch on the surface, please use No. 1500 water abrasive cloth polishing slightly to clear away scratches, and then polish with toothpaste, cotton flannel. Please don't use strong caustic chemical liquid, such as sulphuric acid, hydrochloric acid, lye during maintenance.

### 2. Plated item maintenance:

Clean the surface of plated item with cotton flannel, please don't use coarse cloth.

### 3. Suction net cleaning:

Turn the screw out and take the suction net out to clean dirt, to keep the water going through smoothly. Don't use strong causticity chemical liquid to clean the product, such as sulphuric, hydrochloric acid, lye and so on.

# AM198ETL-R Water and wire line instruction diagram

## Installation Steps

The product adopts standard accessories, please follow product specifications to install product:

1. Confirm product installation place→2. adjust product to level→3. connect water inlet and drainage pipes→
4. connect power→5. check and clean→6. reset→7. test with water.

### 1. Confirm product installation place

Please refer product specifications to arrange sewage pipes, power socket and water inlet pipe, then check if there is enough space to connect every part.

### 2. Adjust product to level

Adjust movable ground leg of product till level.

### 3. Connect water inlet and drainage pipes

Drainage pipe is in the bottom of tub, the diameter of water drainage outlet is 38mm, and pipe could be bended and stretched; inserting drainage pipe elbow of tub into customer's drainage system pipe with adhesive tape or glass cement during connection. In case of influencing draining water, pipe could not be folded or squashed.

### 4. The Power Connection

The product is adequate for all purchasing requirement power, please follow technical parameter to install power socket and prevent from water, put plug into power socket. (Note: yellow & green wire of water pump are ground wires, diameter of ground wire is 8mm)

### 5. Check and clean

After above steps, please check that if the each joint is sealed well, and then clean up sundries of tub. Open drainer to clean tub with water. To prevent sundries or floating objects stuck in water pump from pipes and nozzle jamming; please clean sundries out from tub.

### 6. Reset

Move product to installation place.

### 7. Test with water

Please confirm the tub is cleaned up, and then close drainer to store water. Check if there is leakage during water test. Till water is higher than water level probe, follow functions instruction of control panel to operate product.

## Faucet switch diagram

## Instruction

Two sets of the faucet:

- A. The faucet is the function conversion. Turn 90° left is the pipe cleaning function while 90° right is the shower head.
- B. The cold-hot water inlet valve is both for hot and cold water. The one with red label or with H mark is for hot water, while the one with blue label or with C mark is for cold water. You could adjust the label on the faucet to get your wanted temperature.

## Instruction

Three sets of the faucet:

- A. Function conversion value. Turn 90° left is the pipe cleaning function while 90° right is the shower head.
- B. The water-in pipe where with blue label is cold water, and the hand-hole faucet with label C is also cold water. Turning left could alternate the volume of the cold water. The maximum is 90° to the left.
- C. The water-in pipe where with red label is hot water, and the hand-hole faucet with label H is also hot water. Turning left could alternate volume of the hot water. The maximum is 90° to the left.

The product designs for water going in from nozzle, also could be used to adjust shower head water in or water in from water outlet faucet. Water in from shower head is usually for body, head cleaning or etc. places.
